

HamiltonBuhl® Kids-Flix™ Digital Camera for Early Learners with Nylon Portable Carrying Case Kit

CAMERA-186

Photography is a combination of art and technology and with today's constant technological leaps, this interactive technology art form has become accessible to all, even younger kids.

Cameras can be used as tools to help develop self-expression and creativity, along with a range of skills their student will utilize throughout their lives. Kids gain confidence and get a boost in self-esteem when sharing their pictures. Shy and withdrawn kids gain a medium to express their thoughts and emotions.

Ruggedly built to withstand handling by kids as young as 3 years old, the Kids-Flix™ camera features front and back lenses, 2" LCD screen, an 8GB micro SD card (with capacity to hold up to 32GB micro SD card), and double viewfinders, allowing kids to use both eyes when looking at their subject through the viewfinders.

Kids-Flix™ Camera is also a video recorder that captures full HD quality video (1920x1080) and has a selfie-mode.

The portable, nylon carry case holds up to six Kids-Flix™ cameras. The lightweight material makes this a great choice!

digital camera
