Teachers and Staff
from Germs
and Lice!

HygenX-UVC

Keep everyone clean and healthy with the HamiltonBuhl Portable, Automatic Sanitizer, Hygenx-UVC!

This unique portable sanitizer – developed, patented and built exclusively by HamiltonBuhl – automatically and safely sanitizes headphones with UVC light irradiation.

This unit eliminates over 99% of harmful pathogens by passing direct UVC light over the items being sanitized, then reflecting the UVC light off built-in reflectors, completely flooding all the surfaces with the UVC light for one to two minutes.

The Hygenx-UVC is fully automatic and features rolling wheel attachment, extendable handle, an integrated timer, and latches to keep the unit securely closed during the operating cycle and a fast and safe sterilization process!

Specifications
