

MST18

STEAM Maestro™ from HamiltonBuhl® is an ingenious kit that truly delivers on the Science, Engineering, Technology and Arts aspects of STEAM Education, while delighting students of all ages.

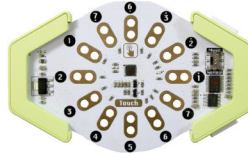

The three function (input, logic, output), colorful, magnetic electronic blocks (power, touch, music and amplifier) combine together to become a musical maestro, producing sound in 16 different instrument styles, when anything conductive is looped into them using the included alligator clips.

Anything conductive – fruits, vegetables, people, plants, pencil lead, Play-Doh, anything – can be used to produce unique sounds!

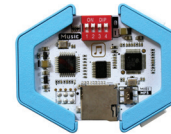

Students ages 5+ will learn about the science of conductive materials, circuits, sounds and will be creating music!
