

Universal VR Remote Controller

The Perfect Tech Accessory!

VRRC

The VRRC is a portable, Bluetooth 3.0 remote controller with four convenient functions: Gaming, Entertainment, Selfie and Mouse (mouse function for Android devices only).

As your gaming controller, VRRC features a 360° joystick and four multi-function buttons, enabling full game immersion with easy-to-use controls and an ergonomic design. Compatible with iOS and Android systems.

As your wireless entertainment controller with nearly 33' Bluetooth distance capacity, it gives you all the functionality to be in control of your music tracks and video – increase or reduce volume; skip to next or go back to the last song; pause and play, or go back Home.

As your mobile phone controller, taking selfies become a snap, freeing up your hands from having to hold your mobile phone.

And last, but not least, for your Android devices, it functions as a mouse.

This Universal Remote Controller is the perfect tech accessory to fully enjoy your VR goggles and then some!
