HamiltonBuhl[®] Virtual Reality Anatomy Experience

VR-ANT

An Oculus Go Educational VR Experience!

Explore human anatomy like never before! The HamiltonBuhl® partnership with Envision gives students access to a powerful new way to learn about the human body with the VR Anatomy Experience. Anatomically-correct models are displayed right before their eyes, and students can choose which major organ systems they want to explore from skeletal to reproductive and everything in between.

- 11 Interactive 3D models and information of major organ systems
- Anatomically-correct visuals

- Zoom and placement menu easily zoom in or change the positioning of any organ system
- Animations and cross-sections of the human heart

Students can watch as the chambers of the heart contract to pump blood through each ventricle or see a baby move around in the womb. They will be amazed as they observe the main sections of a human eye split apart and expand.

Give your students invaluable opportunities and access to these unforgettable and deeply impactful experiences with the powerful HamiltonBuhl® VR Anatomy and Body Systems Experience.
