

## Troubleshooting

### **My iPod or iPhone is not making a connection with the dock connector**

- Remove any protective sleeve or cover from your iPod or iPhone
- For best fit, use the Apple Universal Dock Adapter included with your iPod or iPhone (Replacements are available from Apple).

### **I am getting excessive noise or audio distortion**

- Switch iPhone into Airplane Mode or turn off WiFi on iPod Touch to minimize RF interference
- Turn down volume completely on iPhone and iPod Touch before connecting
- When connecting a device through the AUX input, set your device's volume no higher than 80% of maximum to minimize distortion

## Warnings and Precautions

### TO PREVENT FIRE OR SHOCK HAZARDS, DO NOT EXPOSE

**THIS UNIT TO RAIN OR MOISTURE.** To reduce the risk of electric shock, do not remove cover (or back). There are no user-serviceable parts inside. Please refer any servicing to qualified service personnel.

**WARNING:** Changes or modifications to this unit not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.

## Operations

### Listening and Charging Your iPod or iPhone (Devices not included)

- Insert DC cord into back of unit in the DC 9V jack. Plug cord into wall outlet.
- Remove protective cover from dock connector before docking
- To turn the unit on, turn the ON/VOLUME knob to the right. The POWER INDICATOR light will illuminate.
- iPod and iPhone can be connected to docking connector with unit powered off or powered on.

### To Listen with Headphones

- Switch the SPEAKER/EARPHONE SWITCH to the EARPHONE setting.
- Plug in up to six headphones into the HEADPHONE JACKS in the front of the unit. Note – headphones must have a 1/8" mini plug and must operate in stereo mode.

### To Listen with Speakers

- Switch the SPEAKER/EARPHONE SWITCH to the SPEAKER setting.

### Adjusting the Volume

- Adjust the volume by turning the ON/VOLUME knob on the unit.
- When finished listening, power off the unit by turning the ON/VOLUME knob to the far left until you hear a click. Also the POWER INDICATOR light will turn off once the unit is powered off.

*NOTE: If your MP3 player doesn't fit on the dock, connect it via the LINE IN JACK as noted in the LINE IN JACK section below.*

- To recharge the iPod, insert the iPod onto the docking station. The iPod will recharge automatically as long as the unit is plugged in.
- You cannot listen to both the headphones and speakers simultaneously.

### Line in Jack:

- Connect a 1/8" jack stereo connection cable (not included) to the LINE IN Jack on the rear of unit to the Phones/Line out/AUX out jack on the external device such as MP3 players, CD players, computers and more.

## Features

**1. DOCKING STATION** – Compatible with Apple devices including iPod Classic, iPod nano, iPhone and iPod Touch.

**2. POWER/VOLUME** – Turn the knob to the right to turn the unit on; continue to the right to increase the volume level. Turn the knob to the left to decrease the volume. Turn the knob all the way to the left to turn the unit off.

**3. POWER INDICATOR LIGHT** – When illuminated indicates that your unit is powered on.

**4. SPEAKER/EARPHONE SWITCH** – Flipping the switch will activate the sound either in the speakers or to the headphone

jacks as indicated. You cannot have sound in both the headphone jacks and speakers at the same time. Please note headphones must be plugged into the unit in order to hear sound.

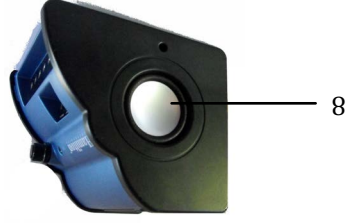

**5. HEADPHONE JACKS** – Accepts 1/8" stereo headphones. Up to 6 headphones can be connected at one time.

**6. LINE IN** – 1/8" stereo mini jack. Use the line in jack to connect any other audio source including other MP3 and MP4 players, computers or CD players. Line cable not included.

**7. DC Connector** – Plug in the detachable DC cord here.

**8. SPEAKERS** – 2W RMS Speakers

**9. DC Cord** – The UL approved DC power supply must be attached in order to provide power
