

Paleo Hunter™ Dig Kit

Dig for the Dinosaur bones of your favorite dino! Have fun discovering the dinosaur skeleton in the block. Put the bones together to make a full dino skeleton. Learn about these gigantic prehistoric creatures – get up-close and share with friends!

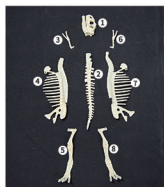

PALEO HUNTER™

Instructions

1. Remove the block of material and tools from the kit. Place them on a mat or large piece of paper. Put on the goggles and mask and start excavating. Use the archaeological tools included in Paleo Hunter and find all the parts of your dinosaur skeleton. Sprinkle a small amount of water as you are excavating to limit dust.
2. Take your time and do not rush to avoid damaging the fossils.
3. After extracting a fossil, brush off the powder, rinse with water, and set aside to dry.
4. Use the diagrams below to help identify and assemble the dinosaur bones. When finished, you will have a complete dinosaur skeleton!

Buy all five boxes
for the complete set.

- Suitable for kids ages 6+.
- Contains small parts. Keep out of reach of young children.
- Wear the protective equipment provided in Paleo Hunter.
- Any waste or powder should be disposed in the garbage. Do not rinse down sink.

CAUTION: Avoid inhaling excess plaster dust. Add/spray some water to each excavated area to prevent plaster dust from becoming airborne. Be careful not to apply too much water, which may soften the plaster beyond its intended consistency.
