

Stop-Motion Animation Workshop

LESSON
4

STORYBOARDING AND STORYTELLING

Introduction

This guide outlines the important stage of “planning” for your final stop-motion animation video. You will be introduced to the process of storyboarding and storytelling, and view examples of other students’ work. You will then be introduced to the process of creating a collaborative storyboard.

- Use the technique of brainstorming to identify a topic for your group animation production;
- Engage in critical reflective thinking as part of the decision-making and problem-solving process;
- Invent and incorporate unique visual symbols and movement to create personal meaning in art;
- Appreciate the diversity of individuals, as reflected in their artwork.

Learning Outcomes

Upon completion of this lesson, you will be able to:

- Explain the importance of storyboarding and storytelling in relation to your stop-motion animation project;
- Use various media and technology to convey messages and meaning;
- Work interactively, co-operatively and collaboratively to plan and create a storyboard;

Storyboarding Your Idea – Telling a Story

Great animation starts with a great “idea” for a story. Telling stories is an age-old method used to communicate ideas and recreate and preserve culture, memories and traditions. By learning how to tell a story through animation, you will be challenged to use symbols and movement to effectively convey your messages and stories. The intent is to tell a meaningful story that expresses a strong message to its intended audience.

Individual Learning Activity: Storytelling and Inspiration

Frédéric Back, author of the acclaimed, Oscar-winning animated film *The Man Who Planted Trees*, is an inspirational figure. His work is an expression of his dedication to a message of peace and respect for the Earth and its communities. Back has created several outstanding animated films that can inspire your students to tell their own meaningful stories. The web pages below explore how his passion for the environment led Back to make animated films in the hope of making this world a better place. fredericback.com/ateliers/index3.en.shtml. (See themes 6 and 7).

All animation productions (and many live-action productions) begin life as a *storyboard*, which is a script of sorts written with images as well as words, similar to a giant comic strip. Storyboarding includes *scene planning*, which requires you to plan out the scenes of your movie from start to finish before you begin animating. Your storyboards will incorporate the key poses in the story; *in-betweens* can be incorporated later. Your group will need to figure out the acting and timing requirements for each scene. Please ensure that your group devises a distinct beginning, middle and end to your story. Remember, the better you plan, the better your animated video will be!

Introduction to Teamwork and Brainstorming

You will create your movies in collaborative teams. Your teacher will assign you to a Production Team of four to six people for the conceiving, planning and production stages of the studio portion of the stop-motion animation lessons.

All teams are expected to work in a respectful and collaborative fashion. Each team member should participate equally and share tasks. As each team member will bring their own unique expertise and talents to the group, everyone's ideas and contributions to the project are to be considered valuable. If you work together effectively, are committed to the project and use your group's diversity of skills, your team's final product will likely be much better than if you had completed the project on your own!

The **Stop-Motion Animation Rubric** see Annex 01 provides guidelines for your team and identifies how each section of the production process will be graded. The high percentage allocation for the teamwork component of this rubric reflects the view that strong teamwork skills are deemed essential to working successfully in the competitive real world of animated film production.

Group Learning Activity: Brainstorming a Topic

Your first task as a team is to effectively brainstorm ideas to help in the selection of a good topic for your animated video. Please identify relevant themes from the following list of subjects.

- English
- Science
- Health
- Technology
- Math
- Social Studies
- Arts (Art, Music, Theatre)
- Media Literacy
(for advanced curriculums—
grades 7 and up)

Some popular and relevant themes identified for your age group include:

- Bullying
- Substance Abuse
- Racism,
- Diversity & Body Image
- The Environment
- Active Healthy Lifestyles

You may choose a topic from the above themes, or think up one of your own. The **Thought Bubble** below may help you brainstorm. Once your team identifies a theme, you may want to research it on the Internet to help you come up with a specific idea for your animation. The idea that you select should be interesting and meaningful to all team members.

Note: Please take your time when devising your topic and story for your animated video, as this initial decision will affect all other steps of the production process!

STORYBOARDING AND STORYTELLING

Creating a Collaborative Storyboard

Once your team has come up with a potential topic for your animation, you will need to have your idea approved by your teacher. Once given the go-ahead, your group will need to begin storyboarding.

Learning Activity: Cartoon Animation

Watch the following video to see how a film is made and to get an idea of the enormous time commitment involved.

Learning Activity: Creating Your Storyboard

You may use a copy of our **Storyboard Sheet** to help plan out your storyboard, use storybook templates found on the Internet or create your own storyboards from scratch. Keep your story and message simple and concise, as it takes 24 frames to make up one second of animation. The process will likely take longer than you might think.

Note: The average animated movie length will vary and depend upon topic selection and length of class time. Your teacher will help each class group determine an appropriate run time.

Use this **Storyboard Rubric** to ensure that your team includes all information and components when designing and completing your storyboard.

Questions you might want to consider include:

- What is your setting?
- How many characters do you need in the shot?
- Do you need any important props in the shot?
- What type of shot (close-up, wide shot, establishing shot, etc.) do you need?
- What is the shot's angle (i.e., how/where is the camera positioned)?
- Do you need any special lighting? The lighting depends on what type of mood you're trying to convey (for example, you may need candlelight, moonlight, a dark alley or a bright sunny day).
- Will you use any special effects?
