DURA-CORD™

One of the building blocks to successful student learning is to teach listening skills that help develop comprehensive language and literacy. Teachers find that students excel when they are more focused on their lessons in classrooms, labs, libraries, and testing environments. Primo™ headphones are uniquely designed to provide the perfect blend of all of these. The noise-reducing earcups allow students to clearly hear their lessons and protect from unnecessary and distracting ambient noise, as well.

Not only are these headphones ideal for the learning environment, but these handy packs of 100 are in either solid black, panda, or tiger earcup designs. Made of ABS plastic, these headphones are rugged and reliable, with 3.5mm stereo plug, making Primo™ a versatile way to connect to almost any audio source – tablets, smartphones, computers and more.
